DETAILED ACTION

Page 2

The following action is in response to the amendment filed for application 10/031,358 on June 24, 2003.

Specification

The amendment filed on June 24, 203 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: applicant has never disclosed an automatic transmission within the original specification. The word "shaltgetriebe" appears to be a generic word for gearbox (see attached German-English translation). However, to say that the word "gearbox" encompasses all types of transmissions, including automatic, may be too broad. Applicant has not disclosed any automatic transmission controls or components, and the original claims make specific reference to only a manual transmission.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regard to claim 13, the limitation of "the manual transmission" on line 5 lacks antecedent basis. This problem also occurs in claims 24 and 25. It is suggested that

Application/Control Number: 10/031,358

Art Unit: 3681

applicant insert --manual-- before the word "transmission" on line 2 of each respective claims 1, 24, and 25.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13, 14, 16, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sherman. With regard to claim 13, Sherman teaches an electrodynamic drive system for a vehicle located between a drive source 11 and a manual transmission (Col. 2, lines 1-4), having a single planetary gear set 10, which includes a sun gear 24, an internal gear 28, a planetary gear 25 and a planetary gear carrier 26, of which the planetary carrier is connected to the manual transmission, the internal gear is connected to the drive source and the sun gear is bound to at least one electric motor 14, with a shift clutch 33 between the planetary gear carrier and the sun gear operable to bypass the planetary gear set (Fig. 1). With regard to claim 14, Sherman teaches the system, wherein a blocking device is provided for torque reinforcement during starting of the drive source 11 (Col. 6, lines 5-17). With regard to claim 16, Sherman teaches the system, wherein the blocking device is a parking lock (Col. 6, liens 11-13). With regard to claim 20, Sherman teaches the system, wherein one of an eddy current brake and a hydrodynamic retarder 31 is placed on a shaft of the planetary drive.

Allowable Subject Matter

Claims 15, 17-19, and 21-29 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

With regard to the Sherman reference, applicant argues that a single planetary gear set "only" consists of a sun gear, internal gear, planetary gear and planetary carrier, and that Sherman lacks this teaching. It should be pointed out that applicant claims in claim 13 (on line 3) that the single planetary gear set "includes" certain parts. This does not limit the number of planetary components within the set. Also, a "single planetary gear set" may comprise of exactly what Sherman teaches (compound planetary gear set). Applicant's arguments have been considered, but are not persuasive.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Application/Control Number: 10/031,358

Art Unit: 3681

(Signature)

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is bein	g facsimile transmitted to the Patent and
Trademark Office (Fax No. (703) 305-3597) on	(Date)
Typed or printed name of person signing this co	ertificate:

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L Pang whose telephone number is 703-305-0445. The examiner can normally be reached on 5:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 703-308-0830. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9326 for regular communications and 703-872-9327 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-2168.
